

## New VOC Zeroing Kit

### VOC Zeroing Kit for ppbRAE and MiniRAE 2000 photoionization detectors

New VOC Zeroing Kit features sealed, single-use, zeroing tubes with ultra high quality filter media to remove any VOC contamination present in ambient air during instrument zeroing procedures.

- Provides the most accurate fresh air zero possible for RAE photoionization detectors
- Kit includes box of 10, single-use, VOC zeroing tubes, and adapter with built in tube tip-breaker
- In order to use the new VOC zeroing tubes and adapter, the instrument must be equipped with a **Flex-I-Probe** inlet.

Part Number	Description	Compatible Instruments	Price
025-3002-100	VOC Zeroing Kit: Kit includes one box of 10 VOC zeroing tubes and one adapter for attaching the zeroing tube to the PID <b>Flex-I-Probe</b> inlet. (In order to use the VOC zeroing tubes and adapter, the instrument <u>must</u> be equipped with a <b>Flex-I-Probe</b> inlet.)	MiniRAE 2000, ppbRAE	\$75.00
025-2000-010	Single use VOC zeroing tubes, box of 10	MiniRAE 2000, ppbRAE	\$25.00
021-2400-100	<b>Flex-I-Probe</b> inlet replacement kit with 6 in (15.2 cm) length inlet probe. Probe comes with one card of 10 spare C-filters	MiniRAE 2000, ppbRAE	\$75.00
021-2400-200	<b>Flex-I-Probe</b> inlet replacement kit with 12 in (30.5 cm) length inlet probe. Probe comes with one card of 10 spare C-filters.	MiniRAE 2000, ppbRAE	\$100.00
024-2004-005	Replacement C-filter (five cards with 10 replacement filters)	MiniRAE 2000, ppbRAE	\$25.00
