

Ballast Flow Diagram

Control Unit

OceanGuard®BWMS Principle

Filtration

- Low back-pressue.
- Automatic back-flushing.
- Removing organism lager than 50um.
- Independent design.

Filter can be installed either vertically or horizontally to significantly ease the retrofitting of BWMS onboard.

Advanced Electro-catalysis Oxidation Process (AEOP)

- By adopting electron excitation to special semiconductor material, highly active Hydroxyl Radicals (-OH) will be produced from water molecules. The Hydroxyl Radicals kill micro-organisms, bacteria, and viruses in water by destroying their cell membrane.

Type Approval

OceanGuard® BWMS -- the most comprehensive Type Approved system

Type Approved by 11 International Classification Societies

Advantages of OceanGuard® BWMS

-  **Low Power Consumption**
Consumption is approx. 17 KW for the treatment of 1,000m3 of ballast water.
-  **Small Footprint**
Compact design ensures flexible installation for vessels of all types and sizes.
-  **Safe & Non-corrosion**
No harmful by-products like H2 or Cl2, and no corrosion to the hull.
-  **Highly effective sterilization**
Complete sterilization, meeting USCG standard.

OceanGuard® Filter Specification

Type	Volume	Dimension	Flow Range
HMT-50F	60	540*510*1450	10-50

Retrofitting Advantages

- Suitable for vessels of all types
- Simple structure and flexible installation
- Small footprint and low power consumption
- One-stop service

Retrofitting Process

Cases

New Building Cases

Type	Container Vessel
Size	4,662 TEU
Model	HMT-600
Time	2014

Type	Tanker
Size	50,000 DWT
Model	HMT-800x2(EX)+HMT-300
Time	2014

Retrofitting Cases

Type	Container Vessel
Size	4,662 TEU
Model	HMT-600
Time	2016

Type	Tanker
Size	50,000 DWT
Model	HMT-800x2(EX)+HMT-300
Time	2015

Type	Bulk Carrier
Size	53,000 DWT
Model	HMT-1000 X2
Time	2015

Type	Suezmax Tanker
Size	149,000 DWT
Model	HMT-2000x2(EX)+HMT-300
Time	2015

Type	Bulk Carrier
Size	61,000 DWT
Model	HMT-1000 X2
Time	2015

Type	Tanker LPG Carrier
Size	8,000 M³
Model	HMT-200
Time	2014
