

C•CURE 9000

Immediate Event Visibility
with Video Integrations

Benefits of Integration:

- Tie video to access control alarms to provide immediate visibility to emergencies
- Manage common video actions from within the C•CURE 9000 interface, simplifying and speeding up security investigations
- Display single cameras or multiple camera views for broader visibility
- Trigger recording on specific access control events, providing a more efficient use of video storage
- Control PTZ presets on C•CURE 9000 events, ensuring you do not miss video associated with alarms
- Manually initiate recording from a camera view during live monitoring
- Monitor recorder and camera status and receive alarms on loss of connection

The C•CURE 9000 security and event management system integrates with a variety of video platforms to provide access control and video surveillance in a single, robust interface for securing an enterprise system. The integration also reduces the costs associated with managing two disparate systems.

With this highly flexible solution, you can view live and recorded video directly from the C•CURE 9000 monitoring station. Within the intuitive interface, you can create events and alarms based on status received from the video server and cameras, and trigger camera actions.

Video integration with C•CURE 9000 correlates video and access alarms providing immediate video delivery to system operators. Instantly access, monitor, and review live and recorded video from any camera or group of cameras connected to integrated video recording platforms.

Perform instant investigation of live and recorded video with interfaces for playback control, PTZ control, and presets. With built-in tools for detection and investigation, the intuitive interface allows you to search through video quickly.

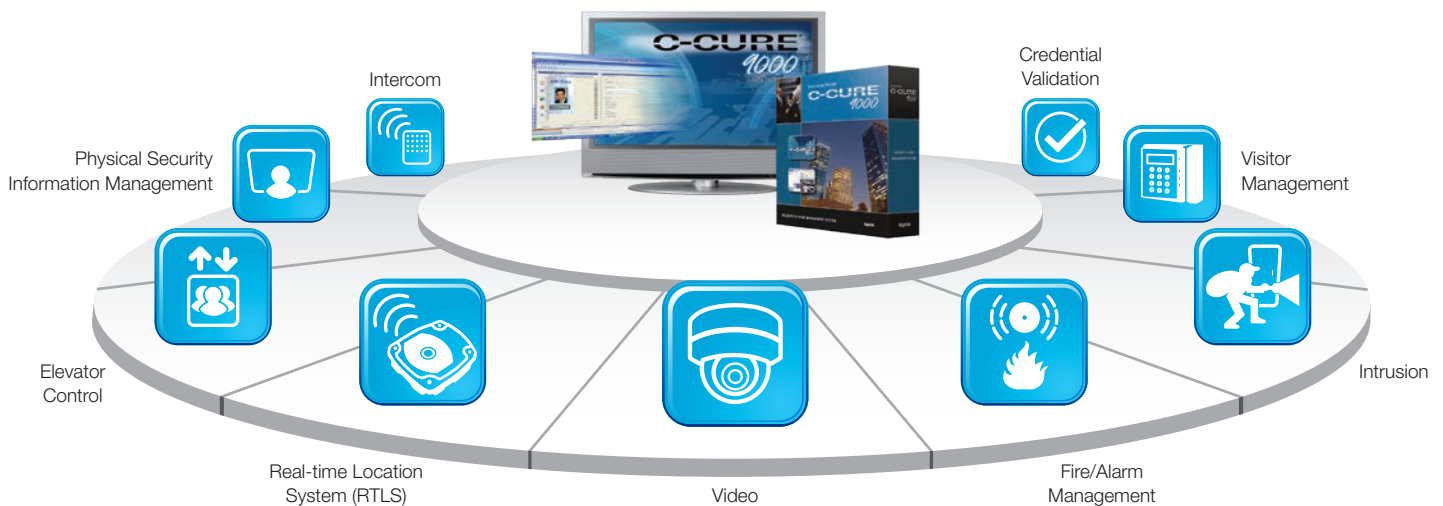

Current Video Integrations Include:

- American Dynamics: VideoEdge, Intellex, HDVR
- Avigilon Control Center
- Bosch VRM
- Digifort NVR
- DVTel Latitude
- Exacq exacqVision
- Genetec Omnicast
- March Networks Command
- Milestone XProtect Corporate
- NICE NiceVision
- OnSSI Ocularis
- Pelco Endura
- Salient Systems CompleteView
- Verint Nextiva
- VideoIQ iCVR Series
- 3VR Video Intelligence Platform

Industry's Most Robust Integration Program: Software House Connected

Dozens of professional developers are enrolled in the Software House Connected Program to bring you myriad integrated solutions including video, intrusion, intercom, fire alarm management, PSIMs and more. The integrations are thoroughly tested, certified by Software House, and delivered to you through the intuitive C•CURE 9000 interface. For a complete list of available integrations please visit www.swhouse.com.

For more information on the video integrations including features and requirements please refer to the Compatibility Matrix and Integrated Solutions section on the Software House website, www.swhouse.com.
