# solo™ 365
**detectortesters**

# The new standard
Faster, simpler, cleaner functional testing of smoke detectors.

**Smoke detector tester**

**detectortesters**
testing technology from No Climb

## A new generation of Solo

**Quicker Testing**
On-demand smoke generation and a light, slim design enable rapid movement and faster testing

**Clearing Mode**
Repeat alarms are all but eliminated – potentially saving up to one hour on-site

**On-Demand Smoke**
Less wasted smoke and no risk of detector contamination

**15% Lighter**
Lighter than the traditional aerosol dispenser, Solo 365 is easy to carry and move into position

**Slim Design**
Solo 365's slim profile allows easy access to hard-to-access detectors

**Easy Storage & Transportation**
Non-hazardous cartridges (instead of aerosol cans) allows for easier storage and transportation

## Testing aspirating smoke detection systems

There's even more to Solo 365 – the ability to functionally test ASD systems. This exciting development is made possible through a specialist adaptor which is fitted to Solo 365 in place of the standard clear cup.

**Utilising the 'Delayed Start' mode**
Allows time for the adaptor to be positioned before smoke is generated.

**Portable ASD tester**
Puts the ability to test standard point type smoke detectors and ASD systems into one portable tester – for the first time.

## ⟋\ Faster

Solo 365 generates smoke on demand, allowing for faster testing around site and fewer repeat alarms.

## ✿ Simpler

Compatible with the widest range of smoke detectors, Solo 365 boasts a slim, lightweight design allowing for simple testing in easy and hard to access spaces.

## ≈ Cleaner

Detector friendly smoke, generated on-demand, eliminates the risk of detector contamination.

# Completely familiar, entirely innovative

**As market leaders with 30+ years' experience**, we understand the need for reliable test solutions that keep track with technological developments – without compromising on the standards set by existing solutions.

Solo 365 is true to this belief – it's lighter to use, quicker to test, suitable for more applications and almost impossible to over-apply – eliminating the risk of detector contamination.

This new method of smoke generation takes Solo – the industry's most trusted brand – to the next level. Solo 365 offers everything the industry expects from the Solo brand, pairing it with the very latest technology and wrapping it in a new modern slim-line design and incorporates non-hazardous, non-pressurised cartridges.

Engineered to be compatible with the increasing number of sophisticated detectors now available, Solo 365 also overcomes the regulatory issues associated with pressurised aerosol canisters.

# Latest technology

**Proximity Sensor**
Automatic generation of smoke as the detector enters and leaves the cup

**Clear Cup & Vent**
Allows easy viewing of the detector during testing and ensures smoke is quickly removed after testing

**LED Torch**
Automatically illuminates when light levels drop, allowing easy alignment with detector

**Consumables Compartment**
Neatly houses all consumables, enabling easy replacement

**Function Button/Delayed Start Mode**
Perfect for testing ASD systems or detectors which cannot enter the cup

**Status LEDs**
Provides notification of unit mode status

## Urban 5M Smoke Test Kit
